

## Localecopia Lecture Series 2014–2015

Localecopia, Inc., the Palm Beach County born non-profit organization promoting local, sustainable business is proud to announce the inception of the Localecopia Lecture Series.

What started as a yearly visit to Gove Elementary in Western Palm Beach County, is now expanding to a lecture series focused on educating elementary school children on the environment and the importance of real food.

Through the generosity of Localecopia supporters, this organization is able support schools with limited complementary lectures throughout the year.

Participating schools work with Localecopia presenters on selecting one of the discussion topics (see reverse side). Discussions include a presentation, handouts, prizes and plenty of student interaction.

---

**If your school is interested in having Localecopia present, please contact us at [info@localecopia.org](mailto:info@localecopia.org).**

---

## Choose from one of the exciting discussion topics:

**Produce I.D.** - Discuss and taste a variety of fresh produce. Students get to touch, taste and talk about fresh fruits and vegetables.

**Breaking Down Your Favorite Foods** - Take a closer look at the different foods children enjoy, as you discover the strange ingredients found in favorite foods. Ever wondered what is in a Twinkie™?

**Exploring the Color Wheel** - Understand the importance of eating a variety of fruits and vegetables by exploring the nutrients found in colorful produce. Children will be able to sample fruits and vegetables that fall under each category of the color wheel.

**Commercial | Healthy Foods** - Lights. Camera. Action! This interactive class allows students to learn about a specific fruit or vegetable. Groups will work together to collect facts about their specific fruit or vegetable and present a commercial to the class based on their research. Winning commercials will receive a prize.

**Commercial | Saving The Planet** - Roll camera! An interactive class allowing students to learn about a sustainable topic. Groups will work together to collect facts about their fruit or vegetable and present a commercial to the class based on their research results. Winning commercials will receive a prize.

**Ways To Be Green At Home** - Students share how they have adopted green practices at home, while providing additional helpful hints to help conserve the planet in this interactive class.
